SUMMARY

AWS-certified Cloud and DevOps Engineer with 3+ years of experience building, automating and operating secure, scalable cloud infrastructure on AWS. Skilled in Infrastructure as Code (Terraform, CloudFormation), CI/CD pipelines (Jenkins, GitHub, Maven, AWS CodePipeline), containerization and orchestration (Docker, Kubernetes) and GitOps (ArgoCD), monitoring and observability (CloudWatch, CloudTrail, Prometheus) and cloud security (IAM, VPC). Works in Agile/Scrum teams delivering highly available, reliable and cost-optimized environments.

EXPERIENCE

Cloud Engineer (Full-time) — Genpact, Hyderabad, India 2023 – Present

- Developed and optimized AWS infrastructure using VPC, Subnets, Security Groups, IAM, EC2, RDS and S3 to ensure high availability and scalability.
- Automated deployment and provisioning using Terraform and CloudFormation, reducing manual effort and deployment time.
- Built and managed CI/CD pipelines (AWS CodePipeline, CodeBuild, CodeDeploy, Jenkins) for consistent, reliable deployments to EC2.
- Monitored system performance and reliability using CloudWatch and CloudTrail; investigated and resolved incidents to improve uptime.
- Collaborated with security and networking teams to enforce IAM best practices, network policies, and secure architecture design.
- Followed Agile/Scrum methodology, participating in sprint planning, delivery, peer reviews, and documentation.

Cloud Technical Support Intern — Concentrix, Bangalore, India 2022 – 2023

- Delivered cloud infrastructure and application support for AWS services; handled tickets, did troubleshooting, and escalations as needed.
- Worked with engineers to maintain and stabilize cloud environments; improved customer satisfaction by reducing resolution time.

PROJECTS

Automated Infrastructure Deployment (IaC) — Terraform, AWS CloudFormation

- Created reusable Terraform modules and CloudFormation templates to provision VPC, subnets, security groups, EC2, RDS and IAM roles.
- Parameterized environments and configured remote state to keep dev, staging and production consistent.

Multi-Region Load-Balanced Application — Route 53, ALB/ELB, Auto Scaling, RDS

- Designed and deployed a highly available web application using Route 53, ALB/ELB, Auto Scaling and cross-region RDS replication.
- Implemented health checks, failover routing, and backup and restore procedures to ensure resilience across regions.

End-to-End CI/CD Deployment Pipeline (GitOps) — GitHub, Jenkins, Maven, Docker, Kubernetes, ArgoCD

- Built a complete CI/CD pipeline in which GitHub commits trigger Jenkins jobs that compile, test and package the application with Maven.
- Containerized the application with Docker and published versioned Docker images to a container registry.
- Deployed to a Kubernetes cluster using ArgoCD (GitOps), which syncs Kubernetes manifests from Git for automated, declarative and repeatable deployments.
- Automated the full flow from code commit to running application on Kubernetes, enabling continuous delivery with consistent releases and easy rollbacks.

SKILLS

Cloud Platforms & Services: AWS, EC2, S3, RDS, VPC, IAM, Route 53, Lambda, ALB, ELB, Auto Scaling

Operating Systems: Linux, Windows, Linux System Administration, Windows Administration, Shell Environment

Infrastructure as Code (IaC): Terraform, AWS CloudFormation

CI/CD & Automation: Jenkins, AWS CodePipeline, AWS CodeBuild, AWS CodeDeploy, Git, CI/CD, Cloud Automation

Monitoring & Observability: CloudWatch, CloudTrail, Prometheus

Networking & Security: Subnetting, Security Groups, Network ACLs, IAM Best Practices, VPC Design, Route Tables, MFA Enforcement, Least Privilege Access, Cloud Security

Database & Storage: AWS RDS, S3 Bucket Policies, Automated Backups, Snapshots

Programming & Scripting: Python, Bash

DevOps & Practices: DevOps, Agile, Scrum, Sprint Planning, Technical Documentation, Cloud Infrastructure

Support & Operations: Incident Management, Ticket Handling, Escalation Management, SLA Adherence

Ticketing Tools: ServiceNow, Jira

EDUCATION

Central University of Karnataka — Bachelor of Technology in Electronics and Communication Engineering — July 2018 – Aug 2022
Kalaburagi, India | Activities: IEEE Student Member

Muktambika PU College — Department of Pre-University Education, Science stream — July 2017 – June 2018
Gulbarga, India | Focus: Mathematics, Physics, Chemistry

COURSES AND CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) — View Certificate
- AWS Certified Solutions Architect – Associate (SAA-C03) — Amazon Academy
- Cisco CCNA: Network Fundamentals and Essentials
- IP Addressing and Subnetting
